AIR CUSHIONED TABLE CENTER POST 385

In view of the increasing demand for shop display systems for still & video cameras, we have produced a centre column equipped with a standard 58 mm disc and three grub screws as used on our 190 and 055 tripods. This also means the column can be combined with any head from our range. The bottom of the column has an 80mm disc which can be screwed directly to countertop/table or, alternatively, bolted to the included second disc on the underside of the countertop. Specifications: Column diameter: 30mm / 26mm Minimum Height 36cm Maximum Height 62cm Weight 1.1 kg Load capacity 10 kg. Available only in black finish.

LEV. CENTRE COLUMN 555B LEV. CENTRE COLUMN 556B

Our innovative system means you can quickly level your photo or video head without needing to make time-consuming adjustments to the length and angle of each single tripod leg. One of the most common problems in still photography and, above all, video has been resolved by Manfrotto, thanks to the use of a 50mm diameter levelling half ball mounted at the top of a tripod centre column so as to make the angle of the top plate independent of the rest of the tripod. Locking and unlocking of the half ball is via a turning grip on the bottom of the centre column, which can be removed during fitting of the column to your existing tripod.

The half ball-mounted plate has a male 3/8" screw for attachment to a photo or video head, and a bubble spirit level for added ease of use.

LEVEL. CENTER COLUMN ANGLE BRACKET 553

Working with the center column in the horizontal position on Manfrotto tripod models 055, 190 and NEOTEC tripod family has always caused a slight difficulty, in that the head remains at 90° to the ground making it more difficult to position the camera correctly for shooting. Now this simple but had the most stable platform possible for filming, and that we could use ever-lighter materials, from aluminum to carbon fiber, to keep equipment weight to the bare minimum.

SHORT COLUMN 055CCSB SHORT COLUMN 190CCSB

To improve the positioning flexibility of our tripods, a shorter center column is now available as an accessory which can be ordered separately. If you need to work with legs set at the third angle of inclination (about 60°) but still require the possibility to move the camera up and down to achieve perfect adjustment for the shot, this shorter column replaces the one supplied with the tripod.

The lengths are:

- 17.5 cm for the 055CCSB.

- 16.5 cm for the 190CCSB.
